1. OVERVIEW

DiscoverX token is a decentralized, community-driven ecosystem that will allow holders to get the benefit to join our partner projects in the starting phase at the lowest price. The allocation will depend on the amount of tokens the member is holding.

2. GOALS

Our goal is to create an ecosystem where DiscoverX members can participate in these partner projects and reap the benefits just by holding DiscoverX token.

Members will also enjoy the utilities that these partner projects bring to the table some of which can be accessible just by holding the token.

3. BENEFITS

Getting into reliable projects in the starting phase can be difficult. We will vet projects we partner with to reduce risk as much as possible creating a safer environment.

A range of great staking APR's will be offered so while enjoying the utilities, the DiscoverX tokens can be staked for more return.

4. TOKEN

DiscoverX token is a BEP-20 token on the Binance Smart Chain. It can be staked into 5 different tiers. The APR for the tiers depend on the amount of time it is locked for.

The utility of the token is, it allows for holders to participate in new partner launches at the lowest price.

5. STAKING

No lock - Can be unstaked at any time.

Locked - There will be 4 different tiers - 30 days, 90 days, 180 days and 365 days. The longer the tokens are staked, the higher the APR.

6. TOKENOMICS
